

Customer Features Walkthrough

I have dispatched a browser to navigate through the new customer-facing views on your local development server. Here is a visual demonstration of the newly developed features:

Feature Demonstration Recording

This video captures the browsing session showcasing the new **Lookbook**, **VIP Profile**, and the **Native Booking Flow** with the Artisan Concierge widget.

Browser Recording Showcase

Highlights Included in the Walkthrough:

1. **The Lookbook (/lookbook):**

- Displays the public gallery ready to receive portfolio images uploaded directly by the staff from their internal portal. The design maintains the high-end, premium aesthetic.

2. **VIP Loyalty Profile (/profile):**

- The user's dashboard now cleanly integrates with the new `loyalty_profiles` backend.
- Showcases the user's current **Rank/Tier** (e.g., Bronze, Silver, Gold).
- Displays available loyalty points and appointment history natively linked to their profile.

3. **Native Concierge Booking (/book):**

- A step-by-step, premium booking experience.
- Highlights the embedded **Artisan Concierge**, allowing customers to initiate a chat with specific stylists or reception while selecting their services.
